

News Release
FOR IMMEDIATE DISTRIBUTION

DQ Technologies and Computer Associates, Inc. Join Together to Offer Order Delivery Tracking and GPS Solutions

April 14th, 2007 – DQ Technologies and Computer Associates, Inc. would like to announce Ponderosa Order and Dispatch/ Delivery Tracking (ODT) solution for building materials and millwork distribution companies. Integrated with your Ponderosa software, this new ODT solution can help maximize on-time, accurate and reliable deliveries while improving the efficiency and profitability of your dispatch operations; while improving the efficiency and profitability for dispatch operations. The Ponderosa ODT solution will provide dispatch, sales, and management organizations with accurate, detailed daily delivery and scheduling information. What's more, the software's integrated Global Positioning Satellite (GPS) capability lets dispatchers coordinate order combination, routing and fleet tracking to get the most out of your delivery operations.

About DQ Technologies

DQ Technologies focuses on building strong relationships with clients—they want to be viewed as an extension of their client's team and not just another vendor. They strive to learn as much as possible about each customer, their business, and what's most important to them. When customers call DQ Technologies, they hear the same familiar voices each time and know who they're talking with. DQ Technologies currently serves more than 500 clients across North America. For more information, contact Charlie Hansen at (512) 248-8324 or online at www.dqtech.com.

About Computer Associates, Inc.

Headquartered in Smithfield, Rhode Island, Computer Associates (CAI) is a business consulting and software development company with more than 29 years of experience in providing a wide range of professional services and products across a broad spectrum of the commercial and industrial environments. CAI has worked closely with many leading companies in the building materials and millwork industry to apply advanced, industry-specific software concepts and technology innovations that enhance our client's business performance and profitability. With over fifty hardware and software certified professionals on staff, Computer Associates maintains a broad library of Windows 2003-based software in support of its vertical business segments.
